Easington Rural District.

REPORT

OF THE

Medical Officer of Health

FOR THE

Year ended 31st December, 1925.

EASINGTON,

April, 1926.

Gentlemen,

I have pleasure in submitting to you my Fifth Annual Report. As intimated last year this is a survey report and while dealing with the Vital Statistics and Sanitary Work for the year ended 31st December 1925 will also deal with the Sanitary Progress in the District during the past 5 years.

NATURAL AND SOCIAL CONDITIONS OF THE AREA.

Area (in acres)	37,018
Population (1921 Census)	75,558
Population estimated for 1925	82,630

Physical features and general character of the Area :—

The surface of the district is undulating from the coast line at sea level to nearly 500 feet. The soil is generally boulder clay with sometimes beds of sand and gravel. The whole is underlain by the magnesian limestone, which in a few places crops out at the surface. The climate is dry and cold.

Number of inhabited houses (1921)	14,091
Number of families or separate occupiers (1921)	14,554
Rateable value	£303,243
Sum represented by a penny rate	£1,197

The Rateable value on the 31st December, 1925, was £303,243 made up as follows :—

Land £21,291 ; Buildings, £281,952 ; and the Assessable Value £287,275.

SOCIAL CONDITIONS.

The majority of the population is employed in coal mining (655 out of every 1000 male workers) while only 24 per 1000 are engaged in agriculture.

EXTRACTS FROM THE VITAL STATISTICS OF THE YEAR.

	Total	Male	Female	
Births	2208	1156	1052	Birth Rate 27.60
	Legitimate			
	Illegitimate	73	33	40
Deaths	987	550	437	Death Rate 11.94

Number of women dying in, or in consequence of Childbirth : from Sepsis, 4 ; from other causes 6.

Deaths of infants under one year of age per 1,000 births : Legitimate, 107.78 ; Illegitimate, 54.79 ; Total, 106.09.

Deaths from Measles (all ages)	38
„ Whooping Cough (all ages)	14
„ Diarrhoea (under 2 years of age)	30

Birth Rate, Death Rate and Infant Mortality Rate for past 5 years.

	BIRTH RATE		DEATH RATE		INFANT MORTALITY	
	England and Wales	Easington Rural District	England and Wales	Easington Rural District	England and Wales	Easington Rural District
1921	22.4	33.83	12.1	12.71	83	116.69
1922	20.6	29.57	12.9	12.16	77	91.06
1923	19.7	29.06	11.6	12.31	69	102.95
1924	18.8	29.19	12.2	13.34	75	116.1
1925	18.3	27.60	12.2	11.94	75	106.09

987 deaths occurred of which 131 were outside the district and 2281 births were registered compared with 1074 deaths and 2350 births in the previous year. 110 died between the ages of seventy and eighty and 43 between eighty and ninety. 2 females died over ninety, one at 92 and the other, (an inmate of the institution), at 100.

Thirty-five deaths occurred in the Institution Hospital. Of these 13 males and 13 females belonged to your district. 78 deaths were certified by coroner's inquests and 12 deaths were uncertified.

The birth rate compared with the rest of the country is very satisfactory and the death rate would also be better than that of England and Wales if it was not for the large Infant mortality rate due chiefly to the overcrowded conditions under which the people have to live.

BIRTH RATE, DEATH RATE AND ANALYSIS OF MORTALITY DURING THE YEAR 1925

POOR LAW RELIEF :—The amount of Poor Law Relief for the past 5 years has been as follows :—

		Indoor.	Outdoor.	Total.
1925	...	£ 4,694	£ 27,974	£ 32,668
1924	...	4,361	23,930	28,291
1923	...	4,644	24,344	28,988
1922	...	5,259	25,623	30,882
1921	...	5,451	16,384	21,835
		£24,409	£118,255	£142,664

Indoor relief includes Poor Law Institution and Infirmary.

Outdoor relief includes boarded out children.

There was an epidemic of measles during the first half of the year and 38 children died, 36 being under 5 years of age. Many of these children could be saved if parents would treat the disease more seriously and keep them in bed. In this way the secondary causes of death such as bronchitis and pneumonia might be avoided.

During the last 2 months of the year there was an outbreak of smallpox at Murton. The origin was an unrecognised case which had come from an infected area. The majority of the cases were mild but one or two were rather severe. No case occurred in a child of school age who had been vaccinated in infancy and the chief lesson to be learned from the outbreak only goes to confirm what is already well known that the only safeguard is vaccination.

The Joint Smallpox Hospital being unable to accommodate all the patients some had to be sent to Blackfell and some to Middlesbrough.

GENERAL PROVISION OF HEALTH SERVICES IN THE AREA.

HOSPITALS IN THE DISTRICT.

Name	Supported by	Beds	Situation
Thorpe Isolat'n	Easington R.D.C.	64	Thorpe
Joint Smallpox Institution	Easington & Sedgfld.	24	Thornley Parish
Horden Cottage	Easington B. of G.	112	Easington
	Horden Workmen	6	Horden

THORPE HOSPITAL :—An observation block which has been badly needed has been added at a cost of £2100.

The Scarlet and Diphtheria pavilions have been linked up for heating purposes with this new block and are now heated from a central boiler by means of pipes and radiators. This will be of great advantage as by the old fashioned means of a stove in the centre of the ward it was impossible to keep the proper temperature during the winter months.

JOINT SMALLPOX HOSPITAL :—A steam disinfecter has been provided so that no longer the infected clothes will have to be removed from the hospital to be disinfected. The drainage at the hospital has been improved and the telephone has been installed.

INSTITUTION HOSPITAL :—The new nurses' home has been completed and was opened during the year. There is accommodation for a staff of 12.

The General Hospitals available for the district are Newcastle, Sunderland, Hartlepool and Durham.

Unmarried mothers are received into the Institution Hospital and the Children's Home at the old Rectory has normal accommodation for 12 boys and 12 girls.

AMBULANCE FACILITIES :—For infectious cases a motor ambulance is kept at Thorpe Isolation Hospital and a horse ambulance at the Joint Smallpox Hospital. For non-infectious and accident cases the district depends upon the ambulances belonging to the different collieries. At most collieries there is a working arrangement between the owners and the workmen whereby the ambulance can be had to remove cases to and from the infirmaries when it is not required for accident cases. At Murton there is a horse ambulance belonging to the workmen.

CLINICS AND TREATMENT CENTRES :—Maternity and Child Welfare Centres are established at Easington Colliery, Horden, Shotton, Wingate, Trimdon, and Wheatley Hill and it is hoped to open a centre at Murton early in the year.

There is one Tuberculosis Dispensary at Horden. These are provided by the County Council.

TREATMENT CENTRES FOR VENEREAL DISEASES:—The nearest Venereal Disease Clinics are, Royal Infirmary, Newcastle, Royal Infirmary, Sunderland, County Hospital, Durham, and Mill House, West Hartlepool.

PUBLIC HEALTH OFFICERS OF THE LOCAL AUTHORITY.

One whole-time Medical Officer	Contribution to salaries is made by Exchequer grants
Two „ Sanitary Inspectors	
One „ Sanitary Surveyor	

Sanitary Inspectors hold certificates of the Royal Sanitary Institute.

The Sanitary Surveyor is an Associate of the Surveyors' Institute, a Member of the Municipal Engineers, and a Member of the Royal Sanitary Institute.

NURSING ARRANGEMENTS

District Nurses work in the following villages:—Easington, Castle Eden, Thornley, Wheatley Hill Kelloe, South Hetton, Haswell and Blackhall.

For Maternity and Infant Welfare six County Health Visitors are in regular work and keep in touch with your Medical Officer.

MIDWIVES:—There are 24 certified Midwives practising in the district:—Five at Wingate, three at Murton, two each at Wheatley Hill, Easington Village, Easington Colliery, South Hetton and

Shotton and one each at Horden, Castle Eden, Thornley, Haswell, Blackhall and Trimdon.

LEGISLATION IN FORCE :—A list of adoptive Acts in force in the District will be found in Table V.

The following Bye-laws of the Rural District Council are in force, with date of adoption :—

	Adopted
1. New Streets and Buildings	... 3rd June, 1909, as amended on 10th July, 1913, and 30th April, 1914.
2. Nuisances	27th June, 1901.
3. Common Lodging-houses ...	27th June, 1901.
4. Cleansing of Footways and Pavements, the Removal of House Refuse, and the Cleansing of Earth-closets, Privies, Ashpits and Cesspools	3rd June, 1909.
5. Dairies, Cowsheds and Milkshops	4th November, 1909.
6. Slaughter-houses	21st March, 1912.
7. Tents, Vans, Sheds, and similar structures used for human habitation	19th October, 1922

SANITARY CIRCUMSTANCES OF THE AREA.

WATER :—The district is abundantly supplied with excellent drinking water chiefly from the Sunderland and South Shields Water Company but partly by the Collieries themselves.

The water is of an exceptionally high degree of purity, and frequent and systematic examinations of the water from all the wells and reservoirs

are made to ensure that the water actually supplied is free from any harmful matter.

The chemical analysis is as follows :—

Total Solids	41.10
Nitrate (N ₂ O ₅)	0.43
Chlorine	2.40
Alkalinity	26.10
Total Hardness	26.0
Temporary Hardness	16.6
Permanent Hardness	9.4

Results in parts per 100,000, except Hardness which is in degrees (Clark).

From the dietetic and health point of view the water leaves nothing to be desired.

It is believed that the normal supply of this water drawn from deep wells in the magnesian limestone will serve the increasing population of the district for at least 10 years by which time it is anticipated that the supply will be augmented from the Burnhope Reservoir in Weardale for the construction of which the Durham County Water Board and the Sunderland and South Shields Water Company are jointly responsible under their acts of 1921 and 1922.

The supply of limestone water is constant being pumped up into suitable reservoirs belonging either to the Sunderland and South Shields Water Company, the District Council or the Collieries.

The possibility of contamination is infinitesimal as the water must percolate from the surface through from 200 to 400 feet of underlying limestone and sand before it is pumped.

It has no plumbo solvent action. No case of contamination has ever been reported.

With the exception of a few outlying farms, which derive their supply from wells, the whole of the population is supplied from this source. Between 60% and 70% of the people have the water supplied direct to their houses, the remainder being supplied by means of stand pipes.

During the year the following extensions of water mains have taken place :—

Haswell Parish	...	165 yards of 3 in. main.
Monk Hesledon Parish	200	„ 3 „
Shotton	„ ...	390 „ 3 „
Thornley	„ ...	233 „ 3 „
Wingate	„ ...	920 „ 3 „

RIVERS AND STREAMS :—The three principal streams in this district are—

South Hetton—Murton Beck.
Gore Beck.
Copperas Beck.

Originally the latter stream was very much polluted, arising through the lack of a main drainage system for the purpose of taking off the subsidiary drainage, but since the completion of the Wingate-to-the-Sea Sewage Scheme in 1921, (which contains approximately $8\frac{1}{2}$ miles of trunk line sewers) the condition of this beck has been greatly improved.

The other streams are still heavily charged with sewage, due to the lack of main drainage

systems for carrying it off to the sea. In each of these two cases, complete sewage schemes have been designed, but, more or less due to financial difficulties the work has not yet been put into operation.

DRAINAGE AND SEWERAGE :—Generally speaking the whole of this district is fairly well equipped with secondary drainage arrangements of a sufficient character to meet the needs. The major portion of the sewage is treated at Sewage Disposal Works, and the lesser amount finds its way into the streams. The Sewage Disposal Works are heavily surcharged and out of date and two main sewerage schemes have been designed to do away with these works and connect up the respective villages and so avoid the necessity of sewage entering the streams in any volume. The combined length of trunk line sewers for the two proposed schemes is approximately 14 miles.

THORNLEY-TO-THE-SEA SCHEME :—A ministry of Health Inspector held an inquiry into this scheme on 2nd September, 1925 and a good deal of correspondence has passed between your Clerk and the Ministry in respect to this inquiry. At the moment the position seems to be that the Ministry of Health desires that such work should be entrusted to an outside Engineer who specialises in this type of work. And probably this course will be pursued.

HASWELL - TO - THE - SEA SCHEME :—No change has taken place in connection with this scheme since my last report and I am still of opinion that every effort should be used to overcome the financial difficulties and get the scheme into operation.

SEWAGE DISPOSAL WORKS :—The various Disposal Works have received the usual care and maintenance and been kept going as far as possible. At Wingate Lane a small electrical pump was installed to deal with the sewage from the new housing in the district.

SEWERS :—All the existing sewers have received the usual care and attention, repairs effected where necessary and generally kept in working condition. The following lengths of sewers with accompanying manholes and equipment have been laid during the year :—

Easington Parish	60 yards of	12-in. Sewer.	
„ „	1662 „	9-in. „	
„ „	776 „	6-in. „	
Haswell	111 „	6-in. „	
Shotton	299 „	9-in. „	
„ „	100 „	6-in. „	
Monk Hesleden	880 „	12-in. „	
„ „	397 „	9-in. „	
„ „	242 „	6-in. „	
Thornley	267 „	12-in. „	
„ „	178 „	6-in. „	
Wingate	982 „	9-in. „	
„ „	256 „	6-in. „	
„ „	471 „	4-in. C.I. Main.	

Seaham Outfall Sewer, 132 yards of 18-in. C.I. pipe were laid to replace the worn out sewer.

CLOSET ACCOMMODATION :—During the last 5 years 399 ashpit-privies were converted into ash-closets and 135 ashpit-privies were converted into water closets.

Total number of Water-closets in the district	...	2,612
Total number of Ash-closets in the district	...	10,699
Total number of Ashpit-privies in the district	...	2,161

SCAVENGING :—The district is efficiently scavenged. With the exception of small townships, and they, largely agricultural, the scavenging is carried out under the direction of the larger Parochial Committees (nine in number). This is a great improvement on the old style of private contracting as in too many instances the private contractors made a convenience of this work.

SANITARY INSPECTION OF THE AREA :—Statutory Notices were served during the year as follows—

Under Sec. 36 Public Health Act 1875, - for 8 houses
 „ Sec. 91 „ „ „ - for 14 houses
 „ Sec. 28 Housing, Town Planning Act 1919 for 2 houses
 and under Sub-Sec. 1 of Sec. 3 Housing Act 1925, for 1 house

Closing Orders were served on 20 houses, huts, vans, etc.

Informal notices were served for the following conditions discovered through casual or special inspections, and the nuisances were abated :—

Dwelling-houses :	Foul conditions	...	22
	Structural defects	...	45
	Overcrowding	...	85
Cowsheds	42
Slaughter-houses	23
Privies removed	126
Ash-pits removed	47
Ash-closets provided	109
Hatches, new ones and repaired	67
Water-closets repaired	9
Additional Water-closets provided	2
Conversions into Water-closets	15
House Drainage :	Old drains relaid	...	69
	Drains repaired	...	50
	New gullies provided	...	70
Rain spouts disconnected	1
New dust-bins provided	29
Deposits of refuse and manure	11
Pig sties	1
Animals improperly kept	8
Offensive trades	4
Other nuisances	21
Yard paving reconstructed or repaired	...	126	
		Total	982

SMOKE ABATEMENT :—Up to the present no action has been taken by the Local Authority with a view to smoke abatement.

HOUSING.

According to the 1921 census on the basis of England and Wales standard, Easington Rural District ought to have had 67,660 rooms for its population of 75,558 so that for the present estimated population of 82,630 it should have 73,993 rooms.

In 1921 there were 50,751 rooms, a deficiency of 16,909 rooms. In 1925 there were 59,790 rooms showing a deficiency of 14,203 rooms.

It is pleasing to be able to state that we are reducing the overcrowding, if somewhat slowly, but the conditions are still appalling. Here are half a dozen cases taken at random from a pile of overcrowdings.

Rooms.	Occupants.	Adults.	Children.
2	10	7	3
3	15	9	6
1	6	2	4
One child suffering from Tuberculosis.			
4	17	6	11
8 living in one small room.			
2	12	8	4

Not only are new houses badly needed but in the older villages many of the houses are unfit for habitation and but for the present great shortage would be condemned.

The Council are doing everything in their power to build as many houses as the present financial position will allow and we can only look to private enterprise to do the rest.

Of the 300 houses approved under the 1924 Act by the Ministry of Health, 156 are completed and occupied and the remainder are almost completed. Two Weir steel houses are also being erected

at Thornley. An additional batch of 200 houses were provisionally approved under the 1924 Act and it is proposed to make application to the Ministry for specific approval for the erection of these 200 houses at an early date.

The following are the number of houses and rooms erected in the different parishes during the past five years :—

Parish		Houses.	Rooms.
Castle Eden	4
Easington	...	263	971
Burdon	...	2	7
Haswell	...	238	894
Hutton Henry	...	2	8
Kelloe	...	3	13
Murton and Cold Hesledon		333	1266
Monk Hesledon		103	326
Seaham	...	268	1085
Shotton	...	584	2108
Thornley	...	260	975
Wingate	...	350	1368
		<hr/>	<hr/>
	Total	2410	8939

Of these, 1478 houses containing 5157 rooms were erected by private enterprise and 932 houses containing 3782 rooms were erected by the Council.

During the past 12 months 118 plans have been approved by the Building Plans Committee.

Certificates of Habitation for 668 houses erected by private enterprise have been issued out of which number 619 were erected under the Housing Subsidy Scheme.

During the year proceedings were taken against owners of wooden huts when convictions were recorded and it is to be hoped that this action will deter others from putting up similar structures.

The following table gives an idea where houses are most urgently needed.

Parish	Popula- tion 1921	Rooms occupied 1921	Rooms Estimd.		Popula- tion 1925	Rooms occupied 1925	Rooms per person 1925
			per person 1921	1921			
Burdon ...	128	132	1.03		138	139	1.00
Castle Eden ...	1770	1975	1.13		1850	1993	1.07
Cold Hesledon ...	820	421	0.51		920	426	0.46
East Murton ...	8691	5059	0.58		9404	6320	0.67
Dalton-le-Dale ...	431	258	0.60		475	258	0.54
Easington & Thorpe	9094	6870	0.77		10151	7841	0.77
Haswell ...	6198	4431	0.72		6660	5325	0.79

Nesbit ...	12	12	1.00		13	12	0.92
Seaham ...	6493	3995	0.62		6952	5080	0.73
Seaton & Slingley	383	353	0.92		418	353	0.84
Sheraton & Hulam	163	187	1.15		174	187	1.07
Shotton ...	15646	9999	0.64		17420	12107	0.69
Thornley ...	3726	2463	0.66		4046	3438	0.84
Wingate ...	11423	7093	0.62		12328	8461	0.68
Total ...	75558	50751			82630	59790	

From the 1921 Census the standard for Easington was .9 rooms per person.

As some Houses built in Cold Hesledon have been put under Murton it will be better to take these two places together when room per person is 0.65.

INSPECTION AND SUPERVISION OF FOOD.

DAIRIES AND COWSHEDS :—These are inspected periodically. There are now 193 persons registered as producers, wholesale traders or retail purveyors of milk. Several retail purveyors have introduced the bottle system with stoppers which is an improvement. No Grade A or pastuerised milk is sold in the district.

There are 47 Slaughter houses in the area some of the recently built ones are good but the majority are not. They are too small, badly lighted and ventilated and in many cases in close proximity to dwelling houses. All unsound meat whether surrendered by the butchers themselves or found by the inspectors on their visits has been destroyed. With a district the size of Easington Rural District and a population of over 80,000 it is quite impossible for 2 inspectors with their various other duties to more than touch on the fringe of meat inspection.

Private Slaughter Houses in the District.

	In 1920	In Jan., 1925	In Dec., 1925
Registered	—	—	—

(4)	Number of dwelling-houses in respect of which Demolition Orders were made	Nil
(5)	Number of dwelling-houses demolished in pursuance of Demolition Orders	Nil

INFECTIOUS DISEASES.

During the year 244 cases were admitted to Thorpe Isolation Hospital and there were 7 deaths. 2 each from Scarlet Fever and Diphtheria and 1 each from Measles, Enteric Fever and Cerebro-Spinal Meningitis. The percentage of admissions still continues to improve.

66 cases of Diphtheria were notified but on examination several were found to be negative.

9 cases of Encephalitis Lethargica were notified but on investigation 4 were found to be suffering from other diseases. There were 2 deaths from this disease.

166 cases of pneumonia were notified. As I have said before in my opinion no useful purpose is served by the notification of this disease as the information conveyed is inclined to be misleading rather than helpful. Year after year the majority of the notifications come from the same villages, while villages adjoining although conditions are much the same, have very few notifications.

4 lots of bedding were destroyed and 428 houses were disinfected after infectious diseases or deaths from tuberculosis.

Diphtheria Antitoxin is supplied free to the medical practitioners in the district and one case is being supplied with insulin. Free bacteriological examinations made were

	Total.	Positive.	Negative.
Phthisis	148	19	129
Diphtheria	9	1	8
Typhoid	1	1	0

No use has been made of the tests known as the Schick and the Dick tests.

Under the Public Health (Smallpox Prevention Regulations) 1917 your Medical Officer performed 225 primary vaccinations and 192 re-vaccinations during the year.

Totals	28	28	14	12	82

Of the 82 deaths from Tuberculosis 73 had been notified and 9 not notified. This is a much bigger percentage of notifications than in former years and it is to be hoped that this result will continue.

No employee engaged in the milk trade was found to be suffering from tuberculosis. No action under Section 62 of the Public Health Act 1925 was taken by the Council.

I am,

Your obedient Servant,

WM. GRANT,

M.B., CH.B., B.H.Y., D.P.H.,

Medical Officer of Health.

To the Easington Rural District Council.
